Internship Report

Industrial training like internship is undertaken as a part of effective implementation of the curriculum. In order to bridge the gap between academia & industry, regular industrial training/visits are arranged which give the students a better idea of the current practices & trends in industry, latest developments, career opportunities etc.

Day by day the competition for engineering graduate professional is increasing. Though the worlds' economy is not favorable in many countries but the demand for qualified and skilled engineers is very strong. The engineering graduate professionals can get opportunity to improve the skills and hand on experience through an Internship. An Internship is like a training to get the industrial exposure and practical hands on experience in any Industry for a small period of time. Students come to know where they stand in the corporate world and the expectations of the employer, by undergoing an Internship

A recent study in The Times newspaper showed that engineering graduates who undertake internships increase their chances of being absorbed by the Industry.   Following are the details of PHCET students undergone the Internship:
