Internship Report

There are plenty of options on where to start your career. Today we are witnessing an exponential increase of young people creating a start-up company while studying, others doing freelance work, but what about students doing internships while studying?

With the increase of youth unemployment around the world, we see a bigger battle for talents and having a degree might not be enough to differentiate from your fellow colleagues. In order to bridge the gap between academia & industry and to differentiate from your fellow colleagues, regular industrial training/visits are arranged which give the students a better idea of the current practices & trends in industry, latest developments, career opportunities etc.

An Internship is like a training to get the industrial exposure and practical hands on experience in any Industry for a small period of time. Students come to know where they stand in the corporate world and the expectations of the employer, by undergoing an Internship

Following are the details of PHCET students undergone the Internship

SNO	NAME OF THE STUDENTS	COMPANY APPLYING	Duration
1	Swati Repale	Reliance Company Ltd	28/12/2017 to 20/01/2018
