Pillai HOC College of Engineering and Technology, Rasayani  
Department of Mechanical Engineering**

**Internship:**

**Mechanical engineers** learn how to analyze, design and create systems (machines, engines, products and technologies) that convert various types of energy into electricity or heat. Mechanical engineers might design power generators, wind turbines, engines, refrigeration and air-conditioning systems, or machines that automate labor. Courses studied by mechanical engineers include thermal systems, statics and dynamics, fluid mechanics, manufacturing and processing, hydraulics, pneumatics, robotics, product design, CAD and computer-aided manufacturing. Mechanical engineers must also understand and apply basic principles from mathematics, chemistry and physics.

**Mechanical engineering internships offer students hands-on experiences that can lead to a job after graduation.**

When students choose a **mechanical engineering degree** at PHCET, we offer the opportunity to participate in an internship; you gain many benefits that will last long past the internship itself or the degree that follows.

Internships have become a valued and vital part of mechanical engineering degree programs, including the one offered at Pillai HOC College of Engineering and Technology, Rasayani. Following are industries where our graduates pursued their internship during **academic year of 2017-18.**
