Department of Mechanical Engineering

Placement:

Mechanical engineers learn how to analyze, design and create systems (machines, engines, products and technologies) that convert various types of energy into electricity or heat. Mechanical engineers might design power generators, wind turbines, engines, refrigeration and air-conditioning systems, or machines that automate labor. Courses studied by mechanical engineers include thermal systems, statics and dynamics, fluid mechanics, manufacturing and processing, hydraulics, pneumatics, robotics, product design, CAD and computer-aided manufacturing. Mechanical engineers must also understand and apply basic principles from mathematics, chemistry and physics.

Mechanical engineering placements are robust, with a variety of job roles and competitive salaries available. By focusing on skill development and gaining relevant experience, graduates can significantly enhance their chances of securing desirable positions in this field. Following are industries where our graduates got placed during **academic year of 2024-25**.
